

- One- or Two-Person Transfers
- Injury Prevention
- Lightweight 5.5 lb. Air Supply
- Workers' Compensation Costs Reduced
- Patient Safety
- Patient Comfort
- Ease of Movement
- Radiology suitable
- No Weight Limit

Why you should use the EZ Matt:

Transfers Laterally with Ease

With the EZ Matt system, medical personnel may transport a patient with ease throughout a facility for various procedures. The patient remains on the EZ Matt through the emergency room, orthopedics, nursing, radiology, surgery, neurology, and oncology procedures. With no metal parts on the mattress, EZ Matt even travels safely through Radiology.

Helps Reduce Injuries

The EZ Matt system helps reduce back injuries and other stresses that may result from lifting patients for a lateral move. EZ Matt also reduces the need for additional personnel to assist in patient transfers. Since EZ Matt helps prevent injuries, workers' compensation and insurance costs may be reduced significantly.

Secures Patient Safety

For the patient, the EZ Matt system means a safer more comfortable move from bed to gurney. EZ Matt reduces the need for lifting, shifting, or sliding that often adds to pain and discomfort. EZ Matt supports the patient safely and results in a smooth, secure transfer.

Operates with Lightweight, Quiet Air Supply

The EZ Matt system transfers a patient on a soft nylon mattress designed with hundreds of tiny perforations on the underside. When the small EZ Matt air supply is attached, the mattress inflates and continues to pump air out of tiny perforations on the underside. This continuous air flow helps eliminate friction between the pad and mattress.

Convenient Storage Bag with Retractable Handle and Wheels

The entire EZ Matt system is easily stored in a rolling storage case. The total system weighs 18 lbs.

Sizes

EZ Matt comes in Large and Bariatric sizes. A large mattress measures 32" x 78" and the bariatric mattress is 46" x 80".

EZ Matt Systems Include:

- 1200W Air Supply with hanger
- Mattress with built-in extension handles
- Protective top sheet
- Transfer bridge
- Rolling storage bag
- Power cord
- 8 ft. air hose
- Operator's Manual
- Training Checklist

System Compatibility

Both the air supply and mattress can be used with other systems on the market.
