

EZ Way, Inc.

eZ 1700 Height Adjustable Bathtub

Fully-functioning bathtub for limited spaces.

The EZ 1700 was specifically designed to optimize your small space without sacrificing functionality and efficiency. Ideal for hospitals, nursing homes and private homes who have limited space and require a fully-functioning bathtub.

The bath raises and lowers to the ideal working height for the attendant, reducing heavy lifting and bending, fatigue and risk of back injury. Clearance below the tub allows the use of many different types of lifts and easy floor cleaning.

Integrated with the EZ 9650 Mobile Resident Chairlift (left), the system provides safe moving and handling for both patient and attendant. During the bathing cycle, the client never leaves the comfort and security of the chair.

EZ 1700 has adjustable feet that increase safety and comfort when there are uneven floor surfaces.

The height adjustment of the EZ 1700 is controlled by a hand control operated from either side of the bathtub.

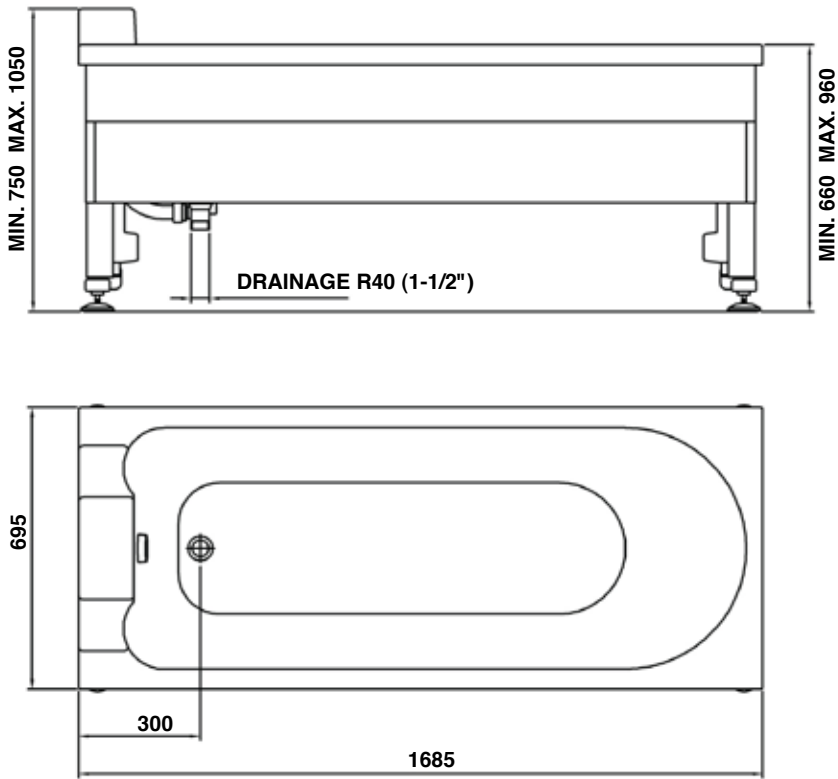

EZ 1700 can be delivered with a thermostat that controls both the bathtub filling and the shower.

OPTIONS

- The EZ 1700 can be delivered with thermostat and shower

"Your Total Patient Lift Solution"

FEATURES:

The EZ 1700 raises quietly and quickly. The hand control for raising and lowering can be operated from either side of the bathtub.

A pop-up drainage closes and opens by turning the overflow valve. No hands need to be in the water.

The factory-mounted thermostat regulates both the bathtub filling as well as the shower water temperature.

The shower handle has a soft rubber outlet nozzle which is easy to clean and gives comfortable soft water dispersion.

The bathtub is made of glassfibre gelcoat and the frame and skirts are made of powder-coated steel.

The drainage can be attached to the floor or the wall.

Adjustable feet increase safety and comfort when there are uneven floor surfaces.
