

EZ Way, Inc.

Bariatric Hygiene Chair

Plenty of room

550 lb. weight capacity and 19" seat depth is larger than standard. 26" between armrests to provide extra room.

Lockable armrests

Armrests can be flipped up and locked into position.

Soft and ergonomic seat

The soft, ergonomic seat is standard and built into the chair. It minimizes pressure on the hips, tendons, and blood vessels and is designed to suit both men and women. Its rounded front edge contributes to a comfortable leg position.

Easy to clean

The seat and backrest are easy to remove and clean. The backrest is machine washable.

Swing-away, detachable footrests

The footrests flip-up, swing-away, and are easily detachable.

Durable materials

Manufactured from corrosion-proof materials.

Hand control

Electric seat height adjustment via a cabled remote.

Soft, adjustable backrest

The soft, comfortable backrest relieves pressure on bony areas. It is easily adjustable for best support and seat depth. Machine washable.

Directionally-locking/lockable casters

One of the casters can be locked directionally for improved safety during transit. The other casters are lockable.

Electric height adjustment

The unique pillar design allows for quick and easy electric seat height adjustment. The seat can be raised up to 32" from its lowest position (21-1/2") and requires minimum effort from care personnel.

FEATURES:

- Provides extra space and strength for the bariatric patient
- Electric height adjustment
- Seat depth is larger than standard chairs at 19"
- 26" between armrests
