# Pelican Sit, Slide & Stand Pad - Bariatric

**A slide pad to help a person of size slide forward and backward in a chair to ease in sitting and standing.**

**407HXW**- 24" wide x 23" deep

### Applications:

- Helps people of size who have difficulty sliding into the back of a chair, and sliding forward to stand up.

### Features and Benefits:

- Allows a person to sit down at the front of a chair, and then slide their hips back into the chair for more comfortable sitting.
- Slides forward so that a person can slide forward to the front of the chair before standing up.
- Webbing handles allow up to four caregivers to assist in sliding the person to the back of the chair or wheelchair.
- Unlike the Regular Side, Slide, and Stand Pad, this pad has a two-way slide action to allow backward or forward sliding to aid in the standing process.
- Comes with a strap and buckle that buckles around the back legs of a chair to prevent sliding forward when seated. Simply unbuckle prior to person sliding forward to stand up.

**Item #407HXW**- 24" wide x 23" deep
